## Amazing Mahjongg

### About the game

"Amazing Mahjongg" is based on a traditional Chinese game **Mahjong** with the history of centuries. This game is very popular in hole of the word even nowadays. It combines elements of skill, strategy, memory, and intuition into a challenging game of patience.

The "Amazing Mahjongg" game is a single-player Pocket PC version of the classic **Mahjong** game.

### Game Features

The main features of the "Amazing Mahjongg" are:

- Online high scores table and worldwide tournament.
- In the end of every successful game you will get a divination from the ancient Chinese "Book of Changes".
- You can select your own image for the game background.
- You can play on more than 20 different layouts.
- You can choose the screen orientation.
- You can install the program to the Storage card.
- You can see statistics for each layout you played.
- You can hide/show the closed tiles (classic game).
- You can to get hints during the game.

### System Requirements

The game is developed for devices based on such popular mobile operating systems as: Windows Mobile 2003/2003 Second Edition, Windows Mobile 5.0.

## Amazing Mahjongg

### Installation

To install the game do the following:

1. Connect your mobile device with your desktop computer via a cable. Run Microsoft ActiveSync. When devices are connected an icon of connection on desktop PC tray bar becomes rich green.
2. On your desktop PC start "**Amazing Mahjongg**" installation file (\*.exe) by double click on it. Installation process will start automatically on your desktop PC
3. Follow the instructions of the installation program.
4. During the installation process you can choose in the following dialog where the "**Amazing Mahjongg**" would be installed (to the storage card or to the main memory of your device).

### Trial version limitations and the game registration

The trial-version of "**Amazing Mahjongg**" program has the time limitation: the game is available for 30 days.

To register your copy, do the following:

1. Start the program "**Amazing Mahjongg**" or, if the game has been already started, return to the **Game Menu**.
2. Tap the "**Help**" button in the **Game Menu** Then proceed to "**Register**" screen using buttons in the bottom of the screen.
3. Enter the **Registration Name** and the **Registration Key** using onscreen keyboard. You receive the registration key for your game after purchasing the software.
4. Tap **Enter** key to complete the registration.

### How to play

After the installation the "**Amazing Mahjongg**" icon appears in the **Programs>Game** folder in the **Start** menu on your device.

#### **The game start**

To start the new game you can use the following buttons:

1. "**New Game**" of the **Main Game Menu**;
2. "**Continue**" of the **Main Game Menu**. Use this button to continue previously started game.

#### **Game rules**

All tiles are built in a pyramid the shape of which can resemble the animals, physics objects, symbols and so on according to the layout you choose.

The goal of the game is to remove all the tiles.

To remove the tiles just select 2 matching tiles.

## Amazing Mahjongg

You have to remove two free tiles according to the following rules:

1. The tiles for removing should be similar for these sets: **Dots, Bamboos, Characters, Winds and Dragons**, e.g. **1 dot – 1 dot, North Wind – North Wind**.
2. You can remove any two tiles which belong to the same set for following sets: **Flowers and Seasons**, e.g. **Plum – Orchid, Winter – Summer**.  
(Refer to **Tiles classification** description to get detailed information about the tiles sets).
3. You can remove only free tiles. Tile considered being free if no other tile lies on it and even its one large side does not adjoin the other tiles.

The game is over when all tiles are removed or there are no tiles to be removed.

### How to remove the tiles

To remove the tiles just select two matched tiles according to the game rules. For this purpose just tap the first tile by stylus. After that the tile will be lighted by yellow color and the tile name will be shown instead of the game time. Then tap the second tile. If the tiles are matched according to the game rules they will be removed automatically and the information about the number of tiles to be removed (**Tiles left**) and the number of the available pairs for the current game state (**Pairs**) will be shown.

If the second tile is not matched it would not be selected and the tiles will not be removed.

### Tile set

A complete set contains 144 tiles. The tiles fall into four categories: suits, honor tiles, flowers and seasons. The suit tiles are numbered 1 through 9, and in any given suit, there are four of each number. The flower and season tiles differ in nature from the suit and honor tiles. There are only 4 season tiles (**Winter, Spring, Summer, and Autumn**) and only 4 flowers (**Bamboo, Orchid, Plum, and Chrysanthemum**).

#### Dots

The dots (also called circles or balls) include 9 tiles of different values:

#### Bamboo

The bamboo's (also called bams or sticks) include 9 tiles of different values:

#### Characters

The characters (also called characks, cracks, or wan) include 9 tiles of different values:

## Amazing Mahjongg

### Winds

The winds (North, South, East, and West):

### Dragons

The dragons (White, Green, and Red):

The red has the Chinese character (in red) for Cheung - meaning center of the four directions. The green dragon is not really a dragon, but a green imprinted Chinese character, Fa (or Fa Choy), meaning "commence" or "begin good luck".

Just as there are four each suit number, there are four of each wind and four of each dragon.

### Seasons

Seasons set includes 4 tiles of different types: **Winter, Spring, Summer and Autumn:**

### Flowers

Flowers set includes 4 tiles of different types: **Bamboo, Orchid, Plum and Chrysanthemum:**

### How to find matching tiles

During the game you can get the hints by using the "?" button or just hold the stylus on the desired tile for 3 seconds in the case if you want to get the hint for this tile.

When you tap the "?" button during the game the tile combination which can be removed will be lighted with blue color. Tapping the button for several times you can see all the tiles combination which can be removed for the current game state.

## Amazing Mahjongg

As tapping the "?" button so as you can just hold the stylus on the desired tile for 3 seconds. In this case if there are tiles which can be removed with the chosen one, they will be lighted with blue color. Instead the played time you will see the number of the matching tiles (**matching tiles**).

If there are not any matching tiles you will see the "**No matching tiles**" instead of the played time and no tiles will be lighted.

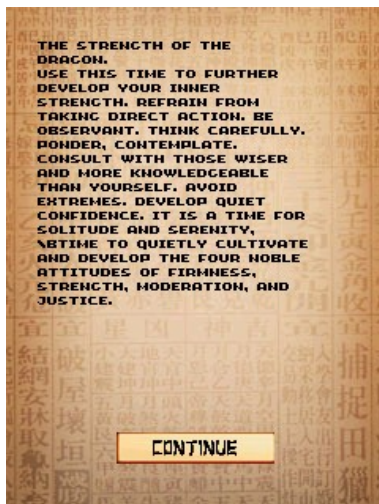

## Amazing Mahjongg

### Interface

#### Game interface

1. Use the button to start the new game for the current layout.
